Claim Rejections - 35 USC § 102 or 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-25 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Arnold et al US 5766424.

Arnold et al teach a process for removing trioxane from a mixture of formaldehyde, trioxane and water in a manner corresponding to that recited in applicants' claims. See, for example, column 1 lines 28-42 and claims 1-2. While patentees only use two distillation stages instead of four as claimed, the cumulative addition of distillation stages would have been readily envisaged and obvious to one of ordinary skill in the art as the results, a more purified product, would not have been unexpected and therefore unpatentable.

No claim is allowed.
